**Data Junction cover story in September's EAI Journal **

Download the article now!

<http://eaijournal.com/Article.asp?ArticleID=413&DepartmentID=6>

It is here! Would you like to know what the future of the integration world will look like? Find out in the September issue of EAI Journal as Greg Grosh, VP of Strategy and Marketing at Data Junction, discusses the new paradigms in the world of enterprise application integration.

** Vote for Data Junction and we'll send a gift to perk you up!**

Intelligent Enterprise Magazine is currently holding their annual Reader

Choice

Awards. Once again, we need you, our valued customer, to cast your vote for Data Junction, the world's most widely deployed data-integration solutions.

All you have to do is go to <http://intelligententerprise.com/rca.html> and follow the directions to vote Data Junction for best Data Integration and Transformation solution.

Opt to have a copy of your answers emailed back to you, then forward us that

information to events@datajunction.com along with your name, your company

name and address. It is not necessary to vote in every category, so this should only take a few seconds.

Your vote means a lot to us. As a small token of our appreciation, we want to treat you to a Starbucks coffee.

Integration 2001 - Another successful User Conference!

Thanks to all of you who joined us at this year's 2nd annual user conference. We sincerely appreciate your participation and support. We had a great opportunity to improve our knowledge base, gain new ideas, and meet new and

old friends. The positive feedback and comments will greatly aid us in designing next year's event.

Stay tuned to this link for details on next year's conference. Also, download presentations from the Conference.

Intermountain Health Care Selects Data Junction For Data Warehousing
9/4/2001

Health Care Organization selects Data Junction Integration Suite(TM) to address HL7, XML and other format integration needs.

http://www.datajunction.com/news.asp?NavID=56&story=release_Intermountain

Data Junction Selected By AtWork Technologies To Automate Data Extracts For Carriers
8/20/2001

Data Junction Integration Suite benchmarked to reduce data throughput time by 95%.

http://www.datajunction.com/news.asp?NavID=56&story=release_AtWork

NOTE! Data Junction's Web site has changed. As such, many of the existing links within our older Help files do not function correctly. However, the Help files have been updated to reflect the new structure and location of our Web site.

To get the newest help files, go to

<http://www.datajunction.com/support.asp?NavID=38>. You may either download

and apply a Maintenance Release, or download the desired Help files.

Simply overwrite the existing Help files in your ..\DataJunction7.5 folder and you should have the newest links to our Web site.

****Power User Tip 1- Connecting to many tables via SQL join statement****

Did you know that you can connect to many SQL tables on a SQL Server database using only one query statement?

If you choose the SQL query statement from your SQL Source Options on the Source (Step 1) tab in the Map Designer, you can set SQL Server as your source type and then select "query statement" from the SQL Source Options. After selecting the query statement radio button, you can write a join statement in the SQL statement box provided. This will let you query the tables and create a custom source table made up of the records you selected.

This way you are using just one SQL statement, streamlining your conversion and increasing its performance time.

****Data Junction Training Schedules****

<http://www.datajunction.com/services.asp?NavID=30>

Data Junction provides multiple training options during a three-day period each month in Austin, Texas. These courses are open to all licensed users of the current version of our software. Users can choose between basic and advanced training sessions, as well as participate in our hands-on workshop. These courses are also open for training of our Alliance Partners. Prior to each course, our Training Coordinator will contact you to discuss your needs and advise you on a course selection.

Upcoming training sessions are scheduled for:

October 17-19
November 14-16
December 19-21

For more detailed information, please go to
<http://www.datajunction.com/services.asp?NavID=30>

****Upcoming Training Partner Schedules****

Listed below are the upcoming training schedules with Data Junction's Training Partners:

Data Management Group announces upcoming training sessions in Virginia.

October 8-9 Introduction to DJ

October 10-11 XML Conversions - Managing the Data Interchange Process

November 5-6 Introduction to DJ

November: 12-14 Comprehensive Data Junction Training
15-16 Advanced Concepts Training
28-30 Accelerated Training Course

Please call Lea Hoxit at 303-296-7676 for more information.

Please visit <http://www.datajunction.com> for more information about
Data Junction's Authorized Training Partners!

****Power User Tip 2 - Updating and appending in the same conversion****
Did you know that you can update and append at the same time using Data
Junction Map Designer?

You can append and update at the same time in Data Junction using the
various Multi-mode target spokes. You can set actions to insert and update
by using the ClearMapInsert and the Update actions on the Map (step 3) tab
of Map Designer. The Update action requires a separate ClearMap action to
occur before the Update action. Now you can set up conditional logic to
fire the actions by using numeric values in the count parameter of that
action. If you want the action to fire, have the count parameter of the
action set to 1. If you do not want the action to fire, have the count
parameter of the action set to 0. For example, if the count parameter in
the ClearMapInsert were set to 1 it would insert that record, if it were
set to 0 it would not insert the record. These actions, in addition to your
logic, will allow you to choose which fields will be updated and which ones
will be appended.

****SPEX, a division of META Group, names Data Junction Integration Suite
June 2001 Product of the Month****

Booth # 614

eBusiness Integration Series
San Francisco, CA
October 29 - 31

eHealthcare World
New York City, NY
December 4 - 6, 2001
Booth # 349

Quote of the Day

"America is not like a blanket--one piece of unbroken cloth, the same color, the same texture, the same size. America is more like a quilt--many patches, many pieces, many colors, many sizes, all woven and held together by a common thread." - Henry M. Jackson
